Furutech Destat II

Destat II Removes Dust and Static for Ultimately Refined Sound

Ultimate Performance • Ultimate Refinement • Ultimate Luxury

The Destat II is incredibly easy to use as it removes dust and static charge from audio/video media in just one 10 second treatment. High performance enthusiasts know that static charges on analog and optical media -- LPs, CDs and DVDs – can lead to distracting noise and compromised sound. Simply place your media on the Destat II or hold it over your media of choice and press one button! The powerful fan removes dust while the Destat II's Balanced Ion Flow Generator – releasing just the right balance of positive and negative ions – eliminates static.

Almost every system component benefits from eliminating its static charge. Use the Destat II to remove static from the audio/video equipment itself – best to turn them off during treatment – plus power cords, line-level interconnects, speaker cables, and metal record clamps! Some household items may even benefit from static charge removal.

The Destat II is small and efficient, has an internal rechargeable battery and is easily used with one hand. Each dust and static removal takes a mere 10 seconds. And there's a safety circuit preventing shock from the Balanced Ion Flow Generator.

The Destat II is just one of Furutech's many treatments for analog and digital playback systems.

“... It really worked as promised removing static cling”

“... deStat does the job in grand style, and will probably last as long as you can buy batteries”

-- Michael Fremer Stereophile October 2007

“...The Furutech deStat turned out to be a piece of tremendous value and it'll take permanent residence next to my turntable”

-- John Potis 6moons October 2007

“...I can't imagine living without it now that I've heard the improvement it can bring.”

-- John Crossett Soundstage September 2007
